### PROLOGRAM™

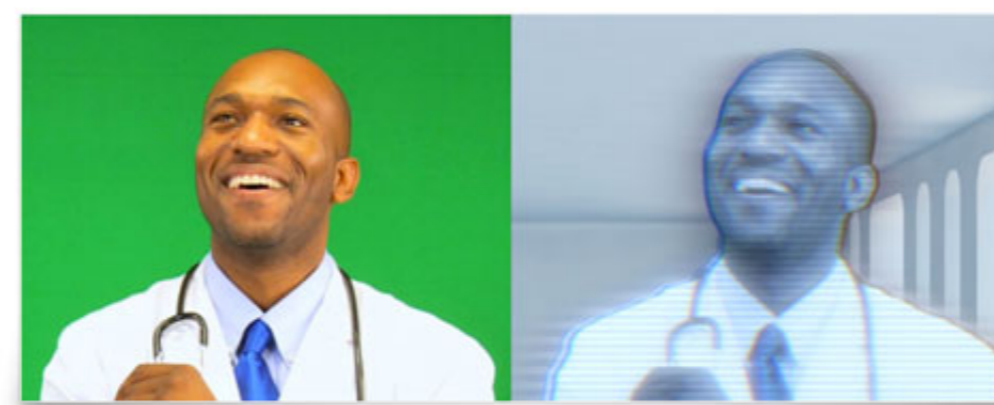

**PROFESSIONAL HOLOGRAM TECHNIQUES**

Want your footage to look like its being transmitted from light years away? With PROLOGRAM™ from Pixel Film Studios™, filmmakers can take their green screen footage and create holographic projections in Final Cut Pro X. Simply scan the effects browser for the shade of green or blue that your screen is and drop it onto your footage.

ProRes HD 1080p 30FPS

**YOU'RE OUR ONLY HOPE**

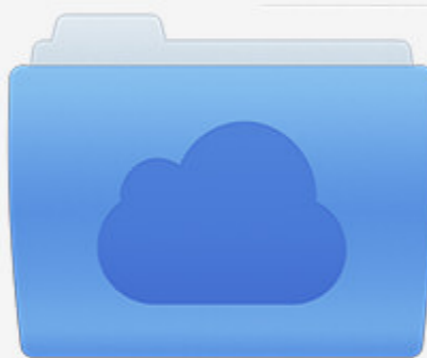

PROLOGRAM™ allows editors to easily film an actor in front of a green screen, and turn them into a projected transmission from another planet in the click of a button. Simply choose the PROLOGRAM™ preset that best matches the green screen color and drop it on top of your clip. PROLOGRAM™ also works great on title sequences.

**RANDOMIZED INTERFERENCE**

This holographic plugin even features randomized glitches and malfunctions to simulate the interference from the light years that the transmission may have travelled. With PROLOGRAM™, editors can make their footage look like its being sent from a Galaxy far far away.
